## Document Body

Good Afternoon:

I left a voice mail message a week or so ago regarding the status of the review of a revised PCB remediation plan for a site in Vernon, 3200 Fruitland Avenue. As a governmental agency that is also operating in these difficult times with multiple projects and tasks often with less staff, I understand that this may be one of the challenges of a large workload that you may be facing.

This 27 acre site has been in the planning stages for remediation for more than 5 years. With a cooperative responsible party, regulatory agency approvals of the remedial action will be followed with implementation. Once the remediation is complete and the site is developed for industrial/commercial uses, the site will be a significant contributor to boosting employment and the economy in the Los Angeles region, which is sorely needed.

I understand you are conducting the review of the revised remediation plan which was submitted several months ago, and I am hoping, that since it is a revision, a final approval is eminent. Any attention you could give this work would be greatly appreciated.

Thank you for your consideration

Lewis Pozzebon, Director / Health Officer
